Contraction BUMP!

Combine math & reading with this fun, interactive game!

Students play with partners.

Student A rolls 3 dice and adds them together to find the sum. Each sum has a corresponding contraction.

Student A figures out which two words make that contraction and puts 1 connecting cube on that spot.

Student B rolls & repeats. If a student rolls the same number/contraction as before they may "lock" it and put another connecting cube on top of their previous one. If a student rolls a number/contraction that only has 1 cube on it, they may BUMP it and put their own color connecting cube on it.

The first student to "lock" ten spots on the game board wins.

☺ Good luck & have fun!
